Twinstang
Founder/Developer
http://twinstang.com
Digital Pilot Logbooking.

MotoPermit
http://motopermit.heroku.com
iPhone app to study for your motorcycle permit test.

Profile

I am an accomplished young man. I thrive on the freedom of the web, its wild west ways, and its great optimism. Discipline and a strong work ethic ensure that I am successful in my endeavors. Ruby, Javascript, the web, and aviation excite me.

Endeavors

Founder/Developer, Signature.io - May 2012 - Present
http://signature.io Invented and developed Signature.io's API platform for signing documents. Technologies include heavy API architecture, Sinatra, Redis, Postgres, and file processing.

Consultant/Developer, Fifty and Fifty - April 2012 - Present
http://fiftyandfifty.org Led development on Fifty and Fifty's biggest projects - World Vision Acts, Donate.ly, and Kony2012. Technologies include Ruby on Rails, Heroku, Redis, Postgres, and API architecture.

Developer, Ministry Centered Technologies - November 2009 - April 2011
http://planningcenteronline.com & http://smartevents.com Employed as #2 developer under the founding developer. Ministry Centered builds planning software. Technologies include Ruby on Rails, MySQL, jQuery, Prototype, RSpec, Unix Server Management, Redis/Resque, Payment Processing, Paypal Payment Processing, and Chord Chart Transposing. Planning Center Online serves over 1,000,000 active users.

Owner/Founder, SpitfireSky.com - August 2006 - December 2012
http://spitfiresky.com Established small web design business in the Inland Empire with focus on Ruby on Rails programming. Responsibilities besides programming included accounting, marketing, client management, and remote team management.
